

CITIZEN CINCOM L20VIII

Sliding Headstock Type Automatic CNC Lathe

Ossi Connectors[®] have generated great success in supplying standard and custom designed CNC turned parts.

To increase our capacity and flexibility we have installed a Citizen Cincom L20V111 automatic CNC lathe with FMB Turbo 3-26 barloader.

Any parts can be supplied within 2 - 26 mm in diameter and 3 - 200 mm in length.

Some parts already supplied are crimp ferrules, cable ferrules, jack screws, cable glands, connector contacts and connector back shells.

Suitable materials are aluminium, brass alloys, copper alloys, steel alloys, stainless steel and polymer materials.

- We are looking forward to receiving your enquiry for CNC turned parts where high precision and superior quality with short leadtimes are guaranteed.
