

Product Change Notification

Product Change Notification Number: CZA061118 Date: 06-11-2018

Title: Design change of cable ferrule for the series CZA and CZAK

Product Identification:

DTZK9	CZA and CZAK series
DTZK15	CZA and CZAK series
DTZK25	CZA and CZAK series
DTZK37	CZA and CZAK series
DTZK50	CZA and CZAK series
DVZK9	CZA and CZAK series
DVZK15	CZA and CZAK series
DVZK25	CZA and CZAK series
DVZK37	CZA and CZAK series
DVZK50	CZA and CZAK series

Reason for Change: Design Processing Logistics Material
 Quality / Reliability **Manufacturing** Location Other

Change Description:

This PCN is related to further improvements of cable ferrule CZA and CZAK in combination with backshells DTZK- and DVZK series. The change in design of cable ferrule enhances the cable retention strength and increases the tensile strength between backshell and cable screen. Design change also provides improved benefits for cable assembly as outlet of cable ferrule is more radius shaped for cable where gap between outer jacket and cable braid is narrow. Current version is phased out against new version depending on the balance of each item.

Qualification Data:	Available now	Available in WMY___	Not applicable
Samples:	Available now	Available in 491218	Not applicable

Quantifiable Impact on Quality and Reliability: Improved

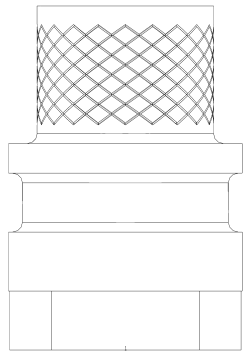

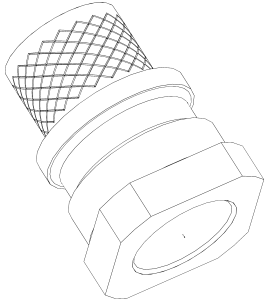

Implementation Date: 25-11-2018
